It will be used to indicate the Geographical application of the rule, type of service (first, coach, etc.), type of transportation (one way or Round trip), type of journey (single open jaw, round trip, Etc.) and applicability for use with joint fares, tour fares and group fares. Provisions for capacity limitations, general rules which are not applicable and miscellaneous information which is not category specific will also appear here. This category will appear with every rule with at least the rule title.

Eligibility (Category 1)

This category is used to define the identification requirements and age range for a particular passenger type, if such conditions exist. It is not used to define the actual passenger types, e.g. clergy, military, etc., for a fare class. Passenger type information is provided in the fare class application. If this category is not present, the assumption is that there are no eligibility restrictions.

Day/Time (Category 2)

This category reflects times and/or days when travel is permitted. The day/time information applies to origins of trips scheduled to depart during that time period. If this category is not present, the assumption is that the fare is available for travel at all times of the day and all days of the week.

Seasonality (Category 3)

This category is used to reflect the dates of a specific season or the dates on which a fare is valid. The assumption for applying this category is that a seasonal fare is based on the season of the origin portion of travel. The seasonal level in effect at the origin is used for all subsequent travel regardless of date. If this category is not present, the assumption is that the fare is available every day of the year.

Flight Application (Category 4)

This category reflects information regarding the use of a fare on specific flight numbers, types of service (non-stop, multi-stop, etc.), equipment types and travel via points. It may be used to reflect either positive or negative application of the information. If this category is not present, it indicates that there are no flight restrictions for the fare.

Advance Reservations/Ticketing (Category 5)

Permitted Combinations (Category 10)

Fares used in combination are to be shown separately on the ticket.

Blackout dates (category 11)

This category is used to define single dates or date ranges when travel is not permitted. the assumption is made that blackouts apply to the scheduled departure time of a flight regardless of the portion of the passenger's travel they represent. if this category is not present, the fare is not subject to blackout dates.

Surcharges (Category 12)

This category defines the conditions under which surcharges are applicable and the corresponding charge. The assumption is that there are no surcharges unless this category is present. If restrictions for a fare may be waived or modified based upon payment of a charge, these conditions will be found in either this category or in (category 16), penalties.

Accompanied Travel (Category 13)

This category is used as a component of a rule when travel with one or more other passengers is necessary to qualify for a fare. if this category is not present, any passenger may travel alone over the entire routing.

first be used for travel or after which it may no longer be used. if this category is not present, the fare is available for travel at all times.

 - (d) All changes must be made prior to the date of the originally scheduled flight as shown on the affected flight coupon.

Rule 65 Tickets

(A) General

- (1) A ticket will not be issued and in any case carrier will not be obligated to carry until the passenger has paid the applicable fare or has complied with credit arrangements established by carrier; and further, the passenger has applied for confirmed space and such space is confirmed, in accordance with the conditions provided for in rule 60(b)(1), by a reservations agent.
- (2) No person shall be entitled to transportation except upon presentation of a valid ticket. Such ticket shall entitle the passenger to transportation only between points of origin and destination and via the routing designated thereon.
- (3) A Ticket comprises one or more Flight Coupons. Each Flight Coupon is issued for exactly one sector. For example: a Ticket from Stockholm to New York and back, with the sectors from Stockholm – Copenhagen, Copenhagen – New York, New York – Copenhagen, Copenhagen – Stockholm comprises four Flight Coupons or one Ticket. In the same way, the flight from Stockholm – Copenhagen, Copenhagen – Stockholm also comprises two Flight Coupons, regardless of any stopover in Copenhagen. The Ticket you have purchased is only valid for the sequence of transportation shown on it. The price you paid is based on our fares and is specially calculated based on the travel dates you have selected and sequence of travel. Therefore, the calculated price applies only to the sequence of transportation shown on the Ticket. This represents an important part of our contract with you. Due to the market situation, fares consisting of several Flight Coupons can be less expensive than the respective individual flight sections. To prevent these cheaper fares from being misused, we have made it a condition of Carriage that the sectors are to be flown in the sequence of transportation shown on the Ticket.

Should you wish to change any aspect of your Carriage, you must contact us in advance. If you are unable to fly the indicated sequence in the order given due to Force Majeure, illness or for any other reason or impediment for which you are not responsible, the remainder of the Flight Coupons shall remain valid. In this case, you may use the remaining Flight Coupons in the sequence shown. The relevant reasons are to be made known to us and substantiated immediately after you become aware of them or after discontinuation of the impediment. In this case, you may use the remaining Flight Coupons in the planned order sequence shown.

Should you have selected a Tariff which provides for compliance with a fixed sequence of travel, please note: if Carriage is not used on all individual legs or not used in the sequence anticipated on the Ticket with otherwise unchanged travel data, we will recalculate the fare according to your altered routing. The new fare will hereby

be determined, and you will have to pay for your actual routing, depending on the Tariff and fare rules for the Ticket. The new fare will be based on the fare available on the day of the request for change of routing. This fare may be higher or lower than the fare you originally paid.

The calculation will be based on the best value price available in your booking class for the changed sequence of transportation. If the booking class originally booked by you is not available for the changed routing on the day of making the reservation, the cheapest available booking class will be used to recalculate the changed sequence of transportation. Any refundable taxes and charges for the unused Flight Coupon will be deducted. Please note that unless the difference in price has been paid, you will not be allowed to travel.

- (4) A ticket which has been improperly issued, shall not be valid.
- (5) Tickets are transferable however carrier is not liable to the owner of a ticket for honoring or refunding such ticket when presented by another person.

(B) Validity for carriage

(1) General

When validated, the ticket is good for carriage from the airport at the place of departure to the airport at the place of destination via the route shown therein and for the applicable class of service and is valid for the period of time specified or referred to in paragraph (2) below. Each flight coupon will be accepted for carriage on the date and flight for which accommodation has been reserved. When flight coupons are issued on an "open date" basis, accommodations will be reserved upon application, subject to the availability of space. The place and date of issue are set forth on the flight coupons.

(2) Period of validity

The period of validity for transportation will be one year from the date on which transportation commences at the point of origin designated on the original ticket, or if no portion of the ticket is used, from the date of issuance of the original ticket.

- (3) Expired ticket
An expired ticket will be accepted for refund in accordance with rule 90(e), (voluntary refunds).

- (5) Expiration of validity

- (C) Involuntary Extension of ticket validity
The following provisions shall apply for passengers travelling at normal or special fares unless otherwise stated in the appropriate Note.
Flight irregularities or booking errors
A carrier may without additional collection of fare extend the validity of the ticket of a passenger who is prevented from travelling within the period of validity of his ticket because such carrier:
 - (1) (a) Cancels the flight upon which the passenger holds confirmed space;
(b) Fails to stop at a point to which the passenger is destined or is ticketed to stopover (whether over or under carriage)
(c) Fails to operate a flight reasonably according to schedule;
(d) Causes the passenger to miss a connection;
(e) Is unable to provide previously confirmed space
 - (2) No space available
When a passenger in possession of a normal fare ticket, or a special fare ticket that has the same validity as a normal fare ticket, is prevented from travelling within the period of validity of his ticket because carrier is unable to provide space on the flight, the validity of such passenger's ticket may be extended until the first flight, of the same class of service paid for, upon which space is available, but not for more than seven days. This rule is applicable only to tickets having a validity of one year.
- (D) Extension of ticket validity and waiver of Minimum/maximum stay provisions
 - (1) In the event of death of a family member not accompanying passenger
In the event a passenger holding a special fare ticket returns prior to the expiry of the minimum stay requirement because of the death of an immediate family member not accompanying him, such passenger will be entitled to a refund of additional amounts paid in order to return early. however, no refund will be permitted unless the passenger is able to produce a death certificate attesting to the fact of the death after

commencement of travel of such family member.
a copy of the death certificate must be retained
in the carrier's files for a minimum period of two
years.

(2) Before commencement of travel

If a passenger or an immediate family member of the
passenger dies before commencement of travel, tickets can,
at any time, be completely refunded. EMD:s issued in
connection with the ticket are also refundable.

Note: For fares originating in CA/MX/US, also travel
companion is included when stated in the PE-rule of the
fare.

Death certificate or a copy of such is required. This is in
accordance with PAT rules 9.3.4.

(3) After commencement of travel

Death of a passenger:

In case of death of a passenger, refund may be arranged. Accompanying
passengers may terminate travel or interrupt travel until completion
of formalities and religious customs, if any, but in no event later
than 45 days after travel is interrupted.

Note: Rebooking in the same booking class or lowest available booking
class in the same service class as originally booked.

No rebooking fee or fare difference shall be collected.

Death in the immediate family:

A passenger travelling at a fare with rerouting/change of reservation
restrictions may return to the place of origin shown in this ticket,
without stopovers en route, at the same fare on the next available
flight.

Or, if death occurred at the point at which travel is interrupted,
immediately after completion of formalities and religious customs, if
any, passenger may extend the validity of the ticket, but in no event
later than 45 days after travel is interrupted.

(E) Coupon sequence and issuance of the ticket

A Ticket comprises one or more Flight Coupons. Each Flight
Coupon is issued for exactly one sector. For example: a Ticket
from Stockholm to New York and back, with the sectors from
Stockholm – Copenhagen, Copenhagen – New York, New York –
Copenhagen, Copenhagen – Stockholm comprises four Flight Coupons
or one Ticket. In the same way, the flight from Stockholm –
Copenhagen, Copenhagen – Stockholm also comprises two Flight
Coupons, regardless of any stopover in Copenhagen. The Ticket
you have purchased is only valid for the sequence of
transportation shown on it. The price you paid is based on our
fares and is specially calculated based on the travel dates you
have selected and sequence of travel. Therefore, the calculated
price applies only to the sequence of transportation shown on
the Ticket. This represents an important part of our contract
with you. Due to the market situation, fares consisting of
several Flight Coupons can be less expensive than the respective
individual flight sections. To prevent these cheaper fares from
being misused, we have made it a condition of Carriage that the

sectors are to be flown in the sequence of transportation shown on the Ticket.

Should you wish to change any aspect of your Carriage, you must contact us in advance. If you are unable to fly the indicated sequence in the order given due to Force Majeure, illness or for any other reason or impediment for which you are not responsible, the remainder of the Flight Coupons shall remain valid. In this case, you may use the remaining Flight Coupons in the sequence shown. The relevant reasons are to be made known to us and substantiated immediately after you become aware of them or after discontinuation of the impediment. In this case, you may use the remaining Flight Coupons in the planned order sequence shown.

Should you have selected a Tariff which provides for compliance with a fixed sequence of travel, please note: if Carriage is not used on all individual legs or not used in the sequence anticipated on the Ticket with otherwise unchanged travel data, we will recalculate the fare according to your altered routing. The new fare will hereby be determined, and you will have to pay for your actual routing, depending on the Tariff and fare rules for the Ticket. The new fare will be based on the fare available on the day of the request for change of routing. This fare may be higher or lower than the fare you originally paid.

The calculation will be based on the best value price available in your booking class for the changed sequence of transportation. If the booking class originally booked by you is not available for the changed routing on the day of making the reservation, the cheapest available booking class will be used to recalculate the changed sequence of transportation. Any refundable taxes and charges for the unused Flight Coupon will be deducted. Please note that unless the difference in price has been paid, you will not be allowed to travel.

(F) Carrier will refuse carriage to any person not in possession of a valid ticket.

(G) Nontransferability

A Ticket is transferable in its entirety (but not in part), provided;

- that you contact us with a request for transfer of your Ticket at least 24 hours before the scheduled departure time shown on the first flight coupon of the Ticket,
- that we are the operating carrier of all the flights or flight segments in the Ticket, and
- that the person to whom the Ticket is to be transferred satisfies and complies with all the conditions applying to the original Ticket.

Upon your surrender of your Ticket to us, we will issue a new Ticket in the name of the person to whom the Ticket is to be transferred. The new Ticket will be subject to the same terms and conditions as those of the replaced Ticket. You will be charged an Administration Fee for the transfer of the Ticket. For the avoidance of doubt, a name change is considered a transfer of a ticket even if it is you that is changing your own

name since a name change means that we have to issue a new Ticket.

Except as provided above, a Ticket is not transferable.

The carrier shall not be liable to the person entitled to be transported or to the person entitled to receive such refund for honoring or refunding such ticket when presented by someone other than the person entitled to be transported thereunder or to a refund in connection therewith. If a ticket is in fact used by any person other than the person to whom it was issued, carrier will not be liable for the destruction, damage, or delay of such unauthorized person's baggage or other personal property or the death or injury of such unauthorized persons arising from or in connection with such unauthorized use.

(see also rule 60.)
 - (4) The expiration date of any new ticket issued for a change in routing, destination, carrier(s), class of service, or validity will be limited to the expiration date that would have been applicable if the new ticket had been issued on the date of sale of the original ticket or miscellaneous charges order.
 - (5)
- (C) Involuntary revised routings
In the event carrier cancels a flight, fails to operate according to schedule, fails to stop at a point to which the passenger is destined or is ticketed to stop over, substitutes a different type of equipment or class or service, denies boarding to a passenger holding a confirmed reservation because there is insufficient space on the flight to accommodate him, induces a passenger to surrender voluntarily his confirmed reserved space so that another passenger is not denied boarding involuntarily, or removes or refuses passage to a passenger in accordance with rule 25, carrier will either:

Rule 109 Interline Baggage Acceptance

- (A) Applicability
This rule is applicable to all interline itineraries issued on a single ticket whose origin or ultimate ticketed destination is in Canada.
it establishes how SK will determine which carrier's baggage rules apply to any passenger's entire interline itinerary.
- (B) General
For the purposes of interline baggage acceptance:
- (1) The carrier whose designator code is identified on the first segment of the passenger's interline ticket will be known as the selecting carrier.
 - (2) Any carrier who is identified as providing interline transportation to the passenger by virtue of the passenger's ticket will be known as a participating carrier.
- (C) Baggage rule determination by selecting carrier
- (1) Checked baggage
The selecting carrier will:
 - (a) select and apply its own baggage rules as set out in its tariff to the entire interline itinerary; or
 - (b) select the most significant carrier, as determined by IATA resolution 302 and conditioned by the Canadian Transportation Agency, in order for that carrier's baggage rules, as established in its tariff, to apply to the entire interline itinerary.The carrier identified by means of a) or b) will be known as the selected carrier.
 - (2) Carry-on baggage
Each operating carrier's carry-on baggage allowances will apply to each flight segment in an interline itinerary. Notwithstanding, the carry-on baggage charges that will apply to the entire interline itinerary will be those of the selected carrier.
- (D) Baggage rule application by participating carrier
where SK is not the selected carrier on an interline itinerary but is a participating carrier that is providing transportation to the passenger based on the ticket issued, SK will apply as its own the baggage rules of the selected carrier throughout the interline itinerary.
- (E) Disclosure of baggage rules
Summary page at the end of an online purchase and e-ticket disclosure
- (1) For baggage rules provisions related to a passenger's 1st and 2nd checked bag and the passenger's carry-on baggage (i.e. the passenger's "standard" baggage allowance), when the carrier

sells and issues a ticket for an interline itinerary, it will disclose to the passenger on any summary page at the end of an online purchase and on the passenger's itinerary/receipt and e-ticket at the time of ticketing the baggage information relevant to the passenger itinerary as set out in paragraph 2 below. The disclosed information will reflect the baggage rules of the selected carrier.

 - (f) Application of baggage allowances and charges (i.e. whether they are applied once per direction or if they are applicable at each stopover point).
- (3) The carrier will provide this information in text format on the passenger's e-ticket confirmation. any fee information provided for carry-on bags and the first and second checked bag will be expressed as specific charges (i.e., not a range).

web site disclosure

The carrier will disclose on its web site, in a convenient and prominent location, a complete and comprehensive summary of all the carrier's own baggage rules, including information concerning:

- (a) The maximum weight and dimensions of passenger bags, if applicable, both checked and unchecked;
- (b) The number of checked and unchecked passenger bags that can be transported and the applicable charges;
- (c) Excess and oversized baggage charges;
- (d) Charges related to check in, collection and delivery of checked baggage;
- (e) Acceptance and charges related to special items, e.g. surf boards, pets, bicycles, etc.;
- (f) Baggage provisions related to prohibited or unacceptable items, including embargoes;

- (h) Other rules governing treatment of baggage at stopover points, including passengers subject to

- special baggage allowances or charges etc.
- (F) Definitions
- "Airline designator code"
An identification code comprised of two-characters which is used for commercial and traffic purposes such as reservations, schedules, timetables, ticketing, tariffs and airport display systems. airline designators are assigned by IATA. When this code appears on a ticket, it reflects the carrier that is marketing the flight, which might be different from the carrier operating the flight.
- "Baggage rules"
The conditions associated with the acceptance of baggage, services incidental to the transportation of baggage, allowances and all related charges. for example, baggage rules may address the following topics:
- . The maximum weight and dimensions of passenger bags, if applicable, both checked and unchecked;
 - . The number of checked and unchecked passenger bags that can be transported and the applicable charges;
 - . Excess and oversized baggage charges;
 - . Charges related to check-in, collection and delivery of checked baggage;
 - . Acceptance and charges related to special items, e.g. surfboards, pets, bicycles, etc.;
 - . Baggage provisions related to prohibited or unacceptable items, including embargoes;
 - . Terms or conditions that would alter or impact the baggage allowances and charges applicable to passengers (e.g. frequent flyer status, early check-in, pre-purchasing baggage allowances with a particular credit card); and,
 - . Other rules governing treatment of baggage at stopover points, including passengers subject to special baggage allowances or charges, etc.
- "Interline agreement":
An agreement between two or more carriers to co-ordinate the transportation of passengers and their baggage from the flight of one air carrier to the flight of another air carrier (through to the next point of stopover).
- "Interline itinerary":
All flights reflected on a single ticket involving multiple air carriers. Only travel on a single ticket is subject to the agency's approach provided the origin or the ultimate ticketed destination is a point in Canada.
- "Interline travel":
Travel involving multiple air carriers listed on a single ticket that is purchased via a single transaction.
- "Single ticket":

A document that permits travel from origin to destination. It may include interline/code-share and intra-line segments. It may also include end-to-end combinations (i.e., stand-alone fares that can be bought separately but combined together to form one price).

"Summary page at the end of an online purchase":

A page on a carrier's web site which summarizes the details of a ticket purchase transaction just after the passenger has agreed to purchase the ticket from the carrier and has provided a form of payment.

"Ultimate ticketed destination":

In situations where a passenger's origin is a non-Canadian point and the itinerary includes at least one stop in Canada, as well as at least one stop outside Canada. If the stop in Canada is the farthest checked point and the stop is more than 24 hours, the agency would consider the ultimate ticketed destination to be Canada.

Carrier definitions (various)

"Down line carrier ":

Any carrier, other than the selecting carrier, who is identified as providing interline transportation to the passenger by virtue of the passenger's ticket.

"Marketing carrier":

The carrier that sells flights under its code.

"Most Significant Carrier (MSC)":

Is determined by a methodology, established by IATA (resolution 302), which establishes, for each portion of a passenger's itinerary where baggage is checked through to a new stopover point, which carrier will be performing the most significant part of the service. For travelers under the resolution 302 system, the baggage rules of the MSC will apply. For complex itineraries involving multiple checked baggage points, there may be more than one MSC, resulting in the application of differing baggage rules through an itinerary.

"Most significant carrier (MSC)-IATA resolution 302 as conditioned by the agency":

In this instance, the MSC is determined by applying IATA resolution 302 methodology as conditioned by the agency. The agency's reservation has stipulated that only a single set of baggage rules may apply to any given interline itinerary. The aim of the agency's reservation is to allow the selecting carrier to use the MSC methodology to determine which carrier's baggage rules apply to an international interline itinerary to or from Canada, while reinforcing the role of tariffs in the determination of which carrier's rules apply.

"Operating carrier":

The carrier that operates the actual flight.

"Participating carrier(s)":

includes both the selecting carrier and down line carriers who have been identified as providing interline transportation to the passenger by virtue of the passenger's ticket.

"selected carrier":

The carrier whose baggage rules apply to the entire interline itinerary.

"selecting carrier":

The carrier whose designator code is identified on the first segment of the passenger's ticket at the beginning of an itinerary issued on a single ticket whose origin or ultimate destination is in Canada.

Rule 133 Fares (Applicable to SK only)

(A) General

The mileage routings or specified routing contained in this tariff shall apply only when transportation between the last point of departure in the area comprising area 1 and the first point of arrival outside such area, or vice versa, is via the service of SK unless otherwise prohibited by said tariff. Fares apply only for carriage from the airport at the point of origin to the airport at the point of destination and do not include ground transfer service between airports and city centers except where rule 30 specifically provides that such ground transfer service will be furnished without additional charge. all published fares governed by this tariff and all fares constructed in accordance with this tariff are applicable only when in compliance with all the provisions governing travel as stated herein. Mileage routings (see maximum permitted mileage tariff no. MPM-1, C.A.B. no. 424, NTA(a) no. 239) may be applied to any published or constructed fare; however, if a diagrammatic or linear routing is specified in connection with a fare, such routing must be observed for that portion on the transportation covered by that fare.

(B) Applicable fares

General

- (1) The fare paid shall only be applicable when international travel actually commences in the country of the point of origin shown on the ticket.
- (2) If international travel actually commences in a different country, the fare must be reassessed from such country.

(a) If the routing of the journey is determined as fulfilling the definition of a round trip, circle trip or normal/special fare open jaw trip in resolution 012, the pricing unit must be assessed as a round trip, circle trip or normal/special fare open jaw trip as applicable and must use half round trip fares; the use of one way fares is not permitted. For end-on combination of normal and special fares, completely separate the special and normal fare and assess the normal fare subjourney according to the flow chart

1 Pricing unit
LON-STO 1/2 RT)

* OW fares not permitted as travel is continuous, circuitous and returns to same point

* CTM check LON-MIL RT and LON-STO RT

* Last fare component from country of origin

(b) If there is a common point/country on the routing the journey may be broken into more than one pricing unit provided these must be for return subjourneys using half round trip fares

Example: Travel HEL-BKK-TYO-SEL-TYO-BKK-HEL

- (c) (i) A return subjourney only occurs if the fare is broken more than once at the common point/country. The fare for travel between such fare break points must be priced as a round trip, circle trip or normal/special fare open jaw, as applicable, and must use half round trip fares

MAN-JNB	1/2 RT)	1
	Pricing unit	

* Both subjourneys fall within definition of OJ

* (Note that above journey could also be constructed as NYC-JNB RT)

- (ii) If travel between such fare break points would require the use of one way fares, this is not permitted.

* Use of OW fares not permitted

* Total journey falls within definition of CT and may only be constructed as a single pricing unit

- (d) Fares shall be assessed in the direction of travel, except that the fare component into the country of pricing unit origin shall be in the direction from such country, i.e. not in the direction of travel

Example: Travel FRA-MAD-JNB-MAD-FRA
Construction could be

FRA-JNB RT 1 Pricing unit
or

FRA-MAD	RT	1 Pricing unit
MAD-JNB	RT	1 Pricing unit
		Total of 2 pricing units

* Component JNB-MAD must be in the direction from MAD to JNB

- (3) (a) If the routing of the journey is determined as fulfilling the definition of a normal/special fare open jaw trip in

resolution 012, the pricing unit shall be assessed as two half round trip fares, provided that, if there is a common point(s) or other points in either the country of origin or the country of turnaround or both, the fare may alternatively be assessed as a return subjourney from/to the common point(s) or other points and a one way subjourney(s) for the domestic sector(s).

- (b) In the case of the alternative pricing option the one way pricing unit must be assessed using one way fares and the return subjourney must be assessed using half round trip fares.
- (c) Fares shall be assessed in the direction of travel, except that the fare component into the country of pricing unit origin shall be in the direction from such country, i.e., not in the direction of travel

Example 1: Travel KHH-TPE-SIN-TPE

- (4) (a) If the routing of a journey is determined as Not fulfilling the definition of round trip, circle trip or normal/special fare open jaw trip, it shall be assessed as follows, subject to the routing

(i) As a one way journey

- (ii) As a series of one way subjourneys
- (iii) As a round trip, or circle trip journey with the surface sector assumed flown
- (iv) If there is a common point/country – as a mix of one way subjourney and a return subjourney (subject to paragraphs 2)c) and 2)d) above)

Example: Travel PAR-ATH
Construction PAR-ATH OW 1 Pricing Unit
* Does not qualify for RT, CT or normal fare OJ

Example: Travel PAR-BKK-VIE-ROM
Construction could be
PAR-BKK OW 1 Pricing unit
BKK-VIE OW 1 Pricing unit

- (B) In the case of i), ii) and the one way subjourney in iv) above, the journey/subjourney must be assessed using one way fares; the use of half round trip fares is not permitted.

- (c) Fares shall be assessed in the direction of travel, except that when a pricing unit for a one way subjourney terminates in a country from which a previous pricing unit has been assessed, the pricing unit for the one way subjourney into such country shall be assessed from such country, i.e. not in the direction of travel

Example: Travel ATL-LON-STO-LIS-GLA
Construction ATL-LON OW 1 Pricing unit
LON-STO OW 1 Pricing unit
STO-LIS OW 1 Pricing unit
GLA-LIS OW 1 Pricing unit
Total of 4 pricing units
* Fare component LIS-GLA must be in the direction of GLA-LIS because the termination point (GLA) is in the same country from which a previous pricing unit (LON-STO) was assessed.

- (5) In applying the provisions of subparagraphs 2)d) and 3)c) and except for round trip pricing units, fare components between Canada and USA and between Denmark, Norway, Sweden shall be assessed in the direction of travel.

- (6) Fare construction must be via the itinerary of the passenger. The addition of points not on the passenger's itinerary is not permitted.
exception: constructions using add-on amounts
- (7) Unpublished fares
When it is necessary to establish a fare between any two ticketed points on a journey, the following provisions shall apply, subject to (d)(4):
- (a) the fare shall be the lowest combination of sector fares over an intermediate ticketed point for the class of service used.
- (b) The fare shall be constructed in the direction of travel, except that when the fare is for a fare component which terminates in the country of unit origin or in a country from which a previous pricing unit has been assessed, the fare shall be in the direction from the country, i.e. not in the direction of travel.
- (c) If the same construction point is used for the outbound and inbound fare, the fare shall be constructed in accordance with section b, paragraph 1
- Example: I A to B to C to D TO A
II A to D to C to B to A
- | | | | | |
|-------|-------------------------------|----|--------|----|
| Fares | a to b | 50 | b to A | 45 |
| | B to C | 40 | C to B | 50 |
| | C to D | 60 | D to C | 90 |
| | D to A | 90 | A to D | 50 |
| | No fare A to C no fare C to A | | | |
- Construction: I A to B 50 plus B to C 40 plus C to D 60 plus A TO D 50: Total 200
- II A to D 50 plus D to C 90 plus C to B 50 plus A to B 50: Total 240
- (d) Other than when used for fare construction checks (E.G. HIP, CTM, DMC, OSC, RSC, ETC.) The fares used must be shown separately on the ticket
- (E) Example of DMC
- Example: A to B TO C
- | | | | | |
|--------|--------|----|--------|----|
| Fares: | A to B | 50 | B to A | 45 |
| | B to C | 40 | C to B | 50 |
- Directional minimum check: C TO B 50 PLUS B TO A 45 TOTAL 95
- (8) Fares expressed as a percentage
when fares are expressed as a percentage of another fare and different percentages apply in a pricing unit, the following rule applies:
- a) Apply the percentage to the base fare to establish the fare level as an amount
- b) Use such fare level for the application of all fare construction rules
- Example: A – B – C – D – A
Children's fare: A – C 50% of adult fare
B – C 67% of adult fare

- A – D 50% of adult fare
 - * Calculate amounts resulting from application of above percentages
 - * Apply HIP/CTM etc. rules using the resultant levels
- (9) A journey on a ticket or conjunction ticket, at the time of original issue or when reissued, must not include more than four international arrivals and four international departures in any one country; except in Europe not more than three international arrivals and three international departures in one country in Europe; provided for the counting of arrivals and departures surface sectors are considered to be flown.
- (10) Unless otherwise specified, for the purpose of:
Resolution 017a (except section a paragraphs 6 and 8, section b paragraph 3)
Resolution 017b
Resolution 017c (except paragraphs 3 and 7)e)
Resolution 017f (except section b paragraph 1, section c, section d)
 - (a) Canada and USA shall be considered as one country
 - (b) Scandinavia shall be considered as one country
- (D) Construction rules for journeys – combinations
 - (1) (a) Combinations are only permitted with fares which by their own terms are combinable
exception: combinations to/from USA
(b) Fares used in combination are to be shown separately on the ticket
(c)
 - (2) Round the world: one way special fares shall not be used to calculate fares for round the world travel.
 - (3) Combination of one way normal pricing units with international side trip one way pricing units to or via the country of commencement of transportation shall not be permitted.
 - (4) Combination of fares USA: nothing precludes the combination of international fares and normal/special fares within USA provided that any conditions attached to such fare are complied with; stand-by fares must not be so combined.
- (E) General
 - (1) Combination of fares USA: nothing precludes the combination of international fares and normal/special fares within USA provided that any conditions attached to such fares are complied with; stand-by fares must not be so combined.
 - (2) Notwithstanding any other resolution, the normal fare check will not apply within pricing units.
- (F) Round trip fares
 - (1) Unless otherwise specified in an IATA resolution, the fare for a round trip shall be twice the outbound one way fare.
 - (2) The reference in the round trip definition in resolution 012 to two fare components only, does not preclude fares for end-on combination or side trips paid for separately being shown on the same ticket.

- (3) Round trip fares which by their own terms are combinable may be used with other fares on the basis of half the round trip fare instead of the one way fare.
- (G) circle trip fares
- (1) The fare for a circle trip shall be the lowest combination of half round trip fares in the direction of travel along respective sections involved in the trip, beginning the calculation from the point of unit origin of the trip; provided that for any fare component which terminates in the country of unit origin, the fare applicable to such fare component from the country of unit origin shall be used.
- (2) (a) The applicable fare for a circle trip (excluding any side trip which has been charged as a separate pricing unit) shall not be less than the direct route normal or special round trip fare, as appropriate, for the highest rated pair of points applicable to the class of service used from the point of unit origin to any stopover point on the route of travel.
- (i) when there are round trip fares with different global indicators from the point of unit origin to any stopover point, the fare to be used for the check must be that applicable to the flown itinerary.
- (ii) when the flown itinerary incorporates such different global indicators (including round the world travel), the fare must not be less than the lower of such round trip fares from the point of unit origin provided that, only direct route fares between two points with the appropriate global indicators shall be used; if there is no direct route fare with the appropriate global indicators or there is no global indicator for the routing, it is not necessary to construct such fares.
- Example
- | | |
|-------------------|------------------|
| HKG | |
| MOW | |
| IST | M |
| PAR | 1500 |
| X/SEL | M |
| HKG | 1450 |
| Fare component 1: | HKG-PAR (EH) 1/2 |
| Roundtrip | 1500 |
| Fare component 2: | HKG-PAR (TS) 1/2 |
| Roundtrip | 1450 |
| Total CT | 2950 |
- (b) circle trip minimum check
- (i) Identify the RT fares from HKG to all stopover points based on the routing flown outbound and inbound

- (ii) Delete the higher of the two fares
HKG-MOW (FE) RT 1600 and (TS) RT 2000
HKG-IST (EH) RT 3000 and (TS) RT 4200
HKG-PAR (EH) RT 3000 and (TS) RT 2900
- (iii) From the remaining lower rt amounts,
select the highest (HKG-IST RT 3000) AS
the minimum fare and compare to the CT
total
- (iv) As this is higher, the circle trip is
raised to 3000

Example

Itinerary - LON-HKG-YVR-NYC-LON

Fare construction - 1/2 RT LON-HKG (EH) plus
1/2 LON-HKG (AP)

Fares to be used for the check

Sector	outbound	Inbound
LON-HKG	EH	AP
LON-YVR	EH PLUS PA	AT
LON-NYC	EH PLUS PA	AT

As no direct route fares exist between LON
and YVR/NYC for travel via TC3 and as there
is no global indicator, there is no need to
construct such fares and the at fares alone
will be used.

- (c) When there are round trip fares from the
point of unit origin to any stopover point
which differ according to carrier(s) used
outbound and inbound, the fare to be used for
the check shall be the lower of such round
trip fares.
 - (d) Where more than one normal fare is published
for the carrier(s) and the class of services
used, the lower, lowest level may be used
subject to seasonality (including blackout
dates) and day of week application
 - (e) For round the world travel originating in
Australia/New Zealand the provisions of
subparagraphs 2)a) and 2)b) shall not apply.
 - (f) When checking the circle trip minimum fare,
when special fares are used the comparison
shall be as provided in resolution 017c,
subparagraph 5)b); provided that when no
special direct round trip fare is available
from the point of unit origin to any higher
rated normal fare stopover point, the total
fare shall not be less than the direct round
trip normal economy class fare from the point
of unit origin to such point.
 - (g) The foregoing provisions need not be applied
for points which have been excluded from the
higher intermediate point rule, subject to
the same conditions contained in the
Exclusion.
 - (h) Special fares only the foregoing provisions
need to be applied for points which have
passed the hip check and have not qualified
to be a HIP point.
- (3) Establishing unpublished fares: when it is

necessary to establish a fare for application of the circle trip minimum, the following provisions shall apply, subject to resolution 017a, section b, paragraph 4:

- (a) The fare shall be the lowest combination of round trip fares over any intermediate ticketed point from the point of unit origin for the lowest class of service used.

Example: (I) A to B TO C to D to A

(II) A to D TO C to B to A

Fares: A to B 50 B to A 45

B to C 40 C to B 50

C to D 60 D to C 90

D to A 90 A to D 50

No fare A to C No fare C to A

Circle trip minimum check:

(i) A to B 50 plus B to C 40
Total 90 X 2 Total RT 180

(ii) A to B 50 plus B to C 40
Total 90 X 2 Total RT 180

- (b) The constructed fare shall be considered a 'direct route fare' and must be shown on the ticket as 'C/'.

(H) Open jaw fares

(1) Normal fare open jaw

(A) General

- (i) The fare for a normal fare open jaw pricing unit shall be the sum of half the applicable round trip fares for both international legs of the open jaw, assessed from the country of unit origin.

(ii) Canada, USA shall be considered as one country.

(iii) Except for pricing units wholly within Scandinavia, Scandinavia shall be considered as one country.

(b) Origin open jaw

- (i) Only domestic surface sectors are permitted, except as provided in 1)a)iii) above

(ii) If there is a common ticketed point(s) in the country of unit origin, the fare shall not be less than the highest applicable fare(s) from the common point(s).

Example: GVA-ZRH-BKK-ZRH, the open jaw fare shall not be less than the fare ZRH-BKK-ZRH.

(c) Turnaround open jaw

- (i) Both domestic and international surface Breaks are permitted

(ii) When the surface sector is a domestic surface sector
If there is a common ticketed point(s) in the country of unit turnaround, the fare shall not be less than the highest applicable fare(s) to the common

- point(s).
Example: GVA-TYO surface OSA-TYO-GVA,
the open jaw fare shall not be
less than GVA-TYO-GVA
- (iii) when the surface sector is an
international sector
- (aa) The distance of such surface
sector must not be greater than
the flown distance of the shorter
of the two fare components
(measurement of the surface sector
shall be in accordance with
resolution 017c, paragraph 4)c)
Exception: For travel originating
in Canada or USA, the
surface break may be
permitted between
countries in the
Europe sub-area;
provided travel in
both directions is via
the Atlantic.
- (bb) If there is a common ticketed
point(s) in the country of the
terminal point of a fare
component, the fare shall not be
less than the highest applicable
fare to the common point(s) in the
country(ies) of the terminal
point(s) of the fare component(s).
Example: YMQ-ZRH surface
ROM-ZRH-YMQ, the open
jaw fare shall not be
less than YMQ-ZRH-YMQ.
- (d) Double open jaw
- (i) Combination of an origin open jaw and a
turnaround open jaw with a domestic
surface sector
- (aa) If there is a common ticketed
point(s) in both the country of
unit turnaround, the fare shall
not be less than the highest
applicable fare from the common
ticketed point(s) in the country
of unit origin to the common
ticket point(s) of the country of
unit turnaround.
Example: GVA-ZRH-TYO surface
OSA-TYO-ZRH, the open
jaw fare shall not be
less than ZRH-TYO-ZRH.
- (BB) If there is a common ticketed
point(s) in either the country of
unit origin or the country of unit
turnaround, the fare shall not be
less than the highest applicable
open jaw fare from/to the common
ticket point(s).

- Example 1: GVA-ZRH-TYO surface
OSA-TYO-BSL, the open
jaw fare shall not be
less than GVA-TYO PLUS
BSL-TYO.
- Example 2: GVA-ZRH-TYO surface
OSA-ZRH, the open jaw
fare shall not be less
than ZRH-TYO PLUS
ZRH-OSA.
- (ii) Combination of an origin open jaw and a
turnaround open jaw with an international
surface sector
- (aa) If there is a common ticketed
point(s) in both the country of
unit origin and the country of the
terminal point of a fare
component, the fare shall not be
less than the highest applicable
fare from the common ticketed
point(s) in the country of unit
origin to the common ticketed
point(s) of the country of the
terminal point(S) OF THE FARE
component(S).
- Example: TYO-YMQ-ZRH surface
ROM-ZRH-YMQ, the open
jaw fare shall not be
less than YMQ-ZRH-YMQ.
- (bb) If there is a common ticketed
point(s) in either the country of
unit origin or the country of the
terminal point of a fare
component, the fare shall not be
less than the highest applicable
open jaw fare from/to the common
ticketed point(s).
- Example 1: YTO-YMQ-ZRH surface
ROM-YMQ, the open jaw
fare shall not be less
than YMQ-ZRH plus
YMQ-ROM
- Example 2: YTO-YMQ-ZRH surface
ROM-ZRH-YOW, THE OPEN
JAW fare shall not be
less than YTO-ZRH plus
YOW-ZRH.
- (E) In applying the above common point check
shall only apply to a common point(s) in the
country of origin and/or the country of the
terminal point of a fare component; it shall
not apply to intermediate common points in
other countries.
- Example: YMQ-LON-ZRH Surface
ROM-ZRH-LON-YMQ, the open jaw fare
shall not be less than
YMQ-ZRH-YMQ; no check is applied
YMQ-LON-YMQ.

- (2) Special fare open jaw
Except as otherwise specified in a fare resolution, the fare for an open jaw shall be the sum of half the applicable round trip fares for both legs of the open jaw; provided that when a fare component terminates in the country of unit origin, the fare applicable from the country of unit origin shall be used.
Exception: For travel originating and terminating in Europe (except for travel wholly within Europe): where an open jaw applies between countries in Europe, the fare component which terminates in Europe shall be assessed in the direction from Europe.
- (I) One way fares
 - (1) For one way subjourneys, one way fares must be used.
 - (2) For one way subjourneys, when the respective countries of both origin and destination points of a pricing unit have been used for the assessment of a previous pricing unit, the direction of the last pricing unit will be assessed in the reverse direction of travel.
Example: GVA-JED-ATL-RIO-RUH using ow fares for each sector.
Since both Saudi Arabia and Switzerland have been used for the assessment of previous pricing unit direction of the pricing unit ZRH-RUH shall be from RUH to ZRH.
- (J) Construction rules for fare components
 - (1) Application
the provisions of this resolution must be used to calculate the fare for a fare component in one class of service; if different classes are used the fare shall be calculated as per resolution 017e.
 - (2) Fares
The fare shall not be less than the lower amount obtained by either of the following principles.
 - (a) Mileage principle
 - (i) (aa) Total TPMS shall be compared with the MPM for the fare component
 - (bb) Routings within MPM
where the sum of the TPMS does not exceed the comparable MPM, apply the applicable direct route fare. Such comparison must be made using TPMS, MPMS and fares with the same global indicator provided that, to ascertain the applicable MPM between tc2 and tc3, the sector flown between tc2 and tc3 shall determine the global indicator;
If within a fare component there is more than one sector

		that transits between tc2 and tc3 the sector attracting the highest tpm will be used to determine the MPM
	(cc)	Routings exceeding MPM
		- where the sum of the TPMS is in excess of the MPM: divide the sum of TPMS by the MPM, and surcharge in accordance with the table below. When dividing the sum of TPMS by the MPM the result of the calculation shall be truncated at 5 decimals; the result indicates the mileage percentage to be applied
If the result is over	Up to and Including	The fare shall be not less Than the direct route fare plus
1.00	1.05	5%
1.05	1.10	10%
1.10	1.15	15%
1.15	1.20	20%
1.20	1.25	25%
	over 1.25	Lowest combination
	(dd)	Notwithstanding paragraphs bb) and cc) above, for travel wholly within TC1 which originates, Terminates or has a fare Construction point in Rio de Janeiro or Sao Paulo and neither city is an intermediate ticketed point on such fare component.
		(1) If the fare to or from Rio de Janeiro falls within the MPM, and the fare for the same route to or from Sao Paulo exceeds the MPM, the fare to and from the latter point need not be surcharged.
		(2) If the fare to or from Sao Paulo falls within the MPM, and the fare for the same route to or from Rio de Janeiro exceeds the MPM, the fare to and from the latter Point need not be surcharged.
		(3) if the fare to or from Rio de Janeiro must be surcharged, the fare for the same routing to or from Sao Paulo need not take a higher surcharge (or vice versa).
	(ii)	Specified routings
		When the fare component coincides with the routing in attachment 'a', the direct route fares apply disregarding subparagraph i) above and paragraph 5),

- provided that an intermediate point(s) may be omitted if a more direct routing is used and no additional point(s) is added.
- (iii) MPM deductions
Mileages specified in attachment 'b' must be deducted from the MPM before the comparison with the sum of TPMS is made. these MPM reductions only apply when the fare component and the global indicator coincide with the provisions in the attachment.
- (iv) TPM exceptions
- (aa) TPM deductions
mileages specified in attachment 'c' must be deducted from the total tpm before comparison with the MPM is made
- These TPM deductions only apply when the fare component includes intermediate ticketed points shown in the applicable routing in the attachment; provided additional intermediate ticketed points may be added to the routing.
 - Only one tpm deduction per fare component is permitted.
- (bb) Surface sector TPMS
Any intermediate sector(s) travelled by surface within a fare component must be included in the sum of TPMS, except for intermediate sectors specified in attachment 'd'. In the absence of a tpm for an intermediate sector not listed in attachment 'd', a tpm shall be established by a combination of TPMS.
- (cc) South Atlantic TPMS
- (1) TC12
For transportation between Argentina, Brazil, Chile, Paraguay, Uruguay and Europe, Middle East where a passenger travels on a direct single flight coupon service from a point in Argentina, Brazil, Chile, Paraguay, Uruguay to Miami Or Montreal Or New York or Toronto and on a direct single flight coupon service from such point (i.e. arrival and departure city in North America must be the same) to a point in Europe, Middle East or vice versa, the mileage for these two sectors

shall be deemed to be equal to the ticketed point mileage between the last point of departure in Argentina, Brazil, Chile, Paraguay, Uruguay to the first point of arrival in Europe, Middle east or vice versa.

(2) TC123

For transportation between Argentina, Brazil, Chile, Paraguay, Uruguay and TC3 where a passenger travels on a direct single flight coupon service from a point in Argentina, Brazil, Chile, Paraguay, Uruguay to Atlanta Or Miami or Montreal or New York or Toronto or Washington and on a direct single flight coupon service from such point (i.e. arrival and departure city in North America must be the same) to a point in TC3 or vice versa, the mileage for these two sectors shall be deemed to be equal to the ticketed point mileage between the last point of departure in Argentina, Brazil, Chile, Paraguay, Uruguay to the first point of arrival in TC3 or vice versa.

Note: If a ticketed point mileage is not published for these sectors, calculate the mileage by dividing the maximum permitted mileage by 1.20

- (b) Lowest combination principle
except as provided in resolution 017a,
section b; paragraph 4, the lowest
combination of fares over a ticketed point on
the itinerary.
- (3) Limitations on indirect travel
a fare component must not include more than one
departure from fare component origin or more than
one arrival at fare component destination or more
than one stopover at any one intermediate ticketed
point, additionally
 - (a) A fare component within TC1 or within TC31
must not include more than one arrival and
one departure at any ticketed point.
 - (b) For a journey originating in tc1 no fare
component within tc1 may include more than
one international departure and one

international arrival at any ticketed point in the country where travel originates.

Example: POA-BUE-SAO-NYC – through fare not permitted because of two international departures from Brazil.

- (c) Except for journeys wholly within South America for a pricing unit originating in Brazil, a fare component from a point in Brazil must not include more than 2 domestic sectors in Brazil.

Examples:

1. BSB-RIO-NYC at a through fare BSB-NYC is permitted
2. POA-RIO-SSA-LIS- At a through FARE POA-LIS is not permitted. The international fare component must be assessed from RIO and POA-RIO charged separately
3. FLN-X/CWB-IGU-X/SAO-LON at a through fare FLN-LON is not permitted. The first international fare component must be assessed from IGU and FLN-CWB-IGU charged separately.

- (d) For a pricing unit originating in Germany a fare component from/to a point in Germany must not include more than two domestic sectors in Germany.

- (4) Fare components with a surface sector(s)

- (a) Apply the through fare or the sum of fares over the sectors actually flown, whichever is lower
- (b) In the case of normal fare travel, where the mileage for an international surface break is greater than the ticketed point mileage over the routing travelled from origin of the journey up to the point of commencement of the surface break when normal fares are on both sides of the surface break and the surface break is not included in the through fare, travel from origin of the journey up to the surface break will be ticketed separately, the remainder of the journey being assessed in accordance with resolution 024e.

LON-PAR	OW	1	Pricing unit
Fra-Lon	OW	1	Pricing unit

* Notwithstanding separate pus, the tpm is undertaken from NYC

- (c) In the application of subparagraph b), the surface break shall be measured using ticketed point mileages; if no ticketed point mileage exists for the points concerned, the shortest operated mileage shall be used (i.e.

MPM divided by 1.20); provided that in the event there is no shortest operated mileage, the ticketed point mileage shall be established by a combination of ticketed point mileages. For the purpose of this rule, surface breaks in attachment 'd' and between Canada and USA may be ignored.

(5) Higher Intermediate fare

(a) Normal fares

- (i) If in any routing otherwise permissible at the direct route normal fare there is a direct route normal fare(s) of the same class of service between any two ticketed points which is higher than the direct route normal fare between the fare construction points, the fare shall be not less than the highest fare referred to above (hip). In the case of fares that are established by seasonality (including blackout dates) or day of week or flight application, the check will be based on the applicable fare (by seasonality (including blackout dates) or by day of week or by flight application).
- (ii) If in any indirect routing otherwise permissible at the direct route normal fare plus a percentage, there is a direct route normal fare(s) of the same class of service between any two ticketed points which is higher than the direct route normal fare between the fare construction points, the fare for the indirect route shall be not less than the highest fare referred to above (hip), and the surcharge percentage applicable to the through fare shall be applied to such higher intermediate fare.
- (iii) When there is no direct route fare between two ticketed points, a fare must be constructed over an intermediate ticketed point in order to apply the provisions of subparagraphs 5)a)i) and 5)a)ii)

Example: I A to B to C to D to A
II A to D to C to B to A
Fares A to B 50 B to A 45
B to C 40 C to B 50
C to D 60 D to C 90
D to A 90 A to D 50
No fare A to C No fare C to A

HIP check (assuming journey extends beyond C):

I Outbound A-B-C: A to B 50 + B to C 40 Total 90
II Inbound C-D-A: A to D 50 + D to C 90 Total 140
I Outbound A-D-C: A to D 50 + D to C 90 Total 140
II INBOUND C-B-A: A to B 50 + B to C 40 total 90

The constructed fare shall be considered a 'direct route fare' and must be shown on the ticket as 'C/'

- (iv) In applying the above hip check, the sector shall be
 - (aa) From fare component origin to each intermediate point
 - (bb) From each intermediate stopover point to each subsequent intermediate stopover point
 - (cc) From each intermediate stopover point to the subsequent fare break point.
- (v) When comparing normal fares of the 'same class of service' in order to determine if there is a higher intermediate fare, the following sequence shall be followed
 - Sleeper seat fare is compared with sleeper seat fare;
 - If no sleeper seat fare, compare with first class fare
 - first class fare is compared with First class fare;
 - if no first class fare, compare with intermediate class fare (or next lower class fare)
 - Intermediate class fare is compared with intermediate class fare;
 - if no intermediate class fare, Compare with economy class fare;
 - provided that where more than one economy class fare is published, compare with the highest economy class fare.
- (vi) When comparing normal fares in accordance with the foregoing, the comparison shall be made in the same direction as the fare component. When using half round trip fares the comparison shall be made using half round trip fares. When using one way fares the comparison shall be made using one way fares.
- (vii) Where more than one normal fare is published for the carrier and the class of service used the lower/lowest level may be used subject to any stopover, transfer, seasonality, day of week limitations of the lower/lowest fare (excluding application of stopover charges).
- (viii) When the ticket shows no stopover at both the unit origin and the unit destination point of a side trip which has been charged separately (due to transfer connections on both occasions) a stopover shall be considered to be taken at such point unless the time interval between the arrival immediately preceding the side trip and the departure immediately following the side

- trip does not constitute a stopover as defined in resolution 012.
- (ix) When there is an imbedded surface sector the hip check applies to the point of arrival by air immediately preceding the surface sector and to the point of departure immediately following the surface sector, unless the time interval between the arrival and the departure does not constitute a stopover as defined in resolution 012.
 - (x) When there is a fare construction surface sector, the hip check applies to the point of such surface sector that is not the fare construction point.
 - (xi) Notwithstanding the above.
 - (aa) For journeys originating in Western Africa, the hip check in each fare component shall be applied on all ticketed points in Western Africa.
 - (bb) For journeys wholly between Kilimanjaro and Nairobi, the hip check in each fare component shall be applied on all ticketed points.
 - (cc) For journeys originating in Malawi, the hip checks in each fare component shall be applied on all ticketed points in Malawi.
 - (dd) Except TC12 mid and south Atlantic for journeys originating in the Republic of Yemen, the hip check in each fare component shall be applied on all ticketed points in the Republic of Yemen.
 - (xii) Day-of-week application: in establishing the day-of-week fare level to be used for the hip check the rule for the application of the day-of-week fares shall be applied solely to the sector(s) for which the check is being made. The day of travel on such sector(s) shall be used to determine the day of week fare level to be used for the hip check.
 - (xiii) In establishing the seasonal fare level to be used for the hip check the rule for the application of the seasonal fares shall be applied solely to the sector(s) for which the check is being made. The seasonal rule for such sector shall be used to determine the seasonal fare level to be used for the hip check. where reference in a seasonal rule is to a specific segment of travel e.g. first international sector, the specific segment shall be assessed within the sector(s) for which the hip level is being established.

Example

Routing A – B – C – B – A

First fare component (a to c)

- Fare A-C is a non seasonal fare
- Fare A-B is a non seasonal fare
- There are seasonal fares b-c with the rule that the first international sector determines the seasonal fare to be applied
- To establish the seasonal fare level to be used for the hip check on the sector B-C the date of travel B to C will be used second fare component (fare in the direction from a to C)
- Fare A-C is a non seasonal fare
- Fare A-B is a non seasonal fare
- There are seasonal fares b-c with the rule that the first international sector determines the seasonal fare to be applied
- To establish the seasonal fare level to be used for the hip check on the sector C-B the date of travel C to B will be used

(b) special fares

(i) Having established an applicable special fare for a pricing unit, such special fare may be applied subject to the following

- (aa) price the fare as a normal fare in accordance with paragraph 5)a)
- (bb) Establish the lowest applicable level
 - (1) If there is no HIP between either fare construction point of the special fare and an intermediate ticketed point, the special fare may be applied.
 - (2) If there is a hip between either fare construction point of the special fare and an intermediate ticketed point, the special fare shall be not less than such higher fare, except
 - (a) If there is a special fare of the same type at the same level or a lower level on the sector for which the normal fare applies, the special fare for the component may be applied, or
 - (b) If there is a special fare of the same type at a higher level on the sector for which the higher normal fare applies, the special fare

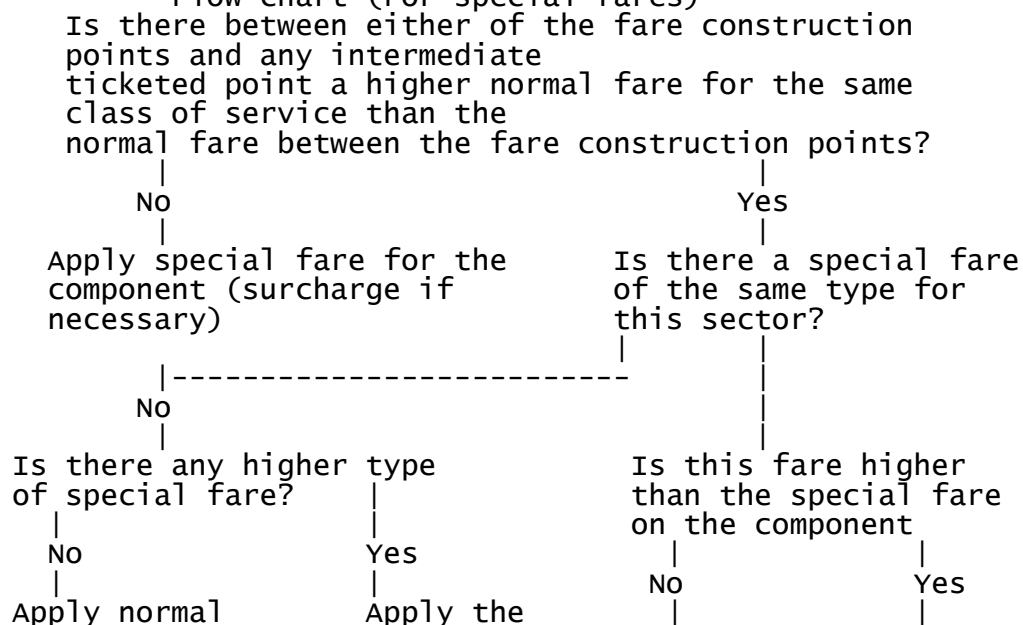

- for the component shall be not less than such higher special fare, or
- (c) If there is no special fare of the same type on the sector for which the higher normal fare applies, the fare shall be not less than the lowest of any higher type of special fare within the same column shown in subparagraph (d).
- (d) In defining a 'fare of the same type' the comparison shall be limited to the class of service and

Column 1	Column 2	Column 3
Late booking fare, or apex fare, or	GIT fare, or individual it fare, or	Public group Excursion fare
PEX fare, or excursion Fare	Excursion fare	

- (e) If there is more than one special fare of the same type on the sector for which the higher normal fare applies, the fare with conditions most similar to those of the special fare for the component shall be used for comparison

- (ii) All conditions attached to the special fare for the component apply

Flow chart (For special fares)

higher inter- mediate point fare (surcharge if necessary)	lowest of any higher special fare type (Surcharge if necessary)	Apply special fare for the component (surcharge necessary)	Raise the fare to such higher special fare (Surcharge if necessary)
--	---	--	--

- (v) when there is an imbedded surface sector the hip check applies to the point of arrival by air immediately preceding the surface sector and to the point of departure immediately following the surface sector, unless the time interval between the arrival and the departure does not constitute a stopover as defined in resolution 012.
- (vi) when there is a fare construction surface sector, the hip check applies to the point of such surface sector that is not the fare construction point.
- (vii) Notwithstanding the above.
 - (aa) For journeys originating in Western Africa, the hip check in each fare component shall be applied on all ticketed points in Western Africa.
 - (bb) For journeys wholly between Kilimanjaro and Nairobi, the hip check in each fare component shall be applied on all ticketed points.
 - (cc) For journeys originating in Malawi, the hip checks in each fare component shall be applied on all ticketed points in Malawi.
- (viii) when comparing special fares in accordance with this paragraph, comparison shall be made in the same direction as the fare component. When using half round trip fares the comparison shall be made using half round trip fares. When using one way fares the comparison shall be made using one way fares.
- (iv) when the ticket shows no stopover at both the unit origin and the unit destination point of a side trip which has been charged separately (due to transfer connections on both occasions) a stopover shall be considered to be taken at such point unless the time interval between the arrival immediately preceding the side trip and the departure immediately following the side trip does not constitute a stopover as defined in resolution 012.

- (6) One way backhaul rule (BHC)
- (a) This paragraph does not apply.
 - (i) For journeys wholly within tc1
 - (ii) For journeys wholly between Argentina, Brazil, Chile, Paraguay, Uruguay and TC2
 - (iii) For pricing units wholly within Europe
 - (b) This paragraph applies only when using normal one way fares and special one way fares.
 - (c) If in any fare component travel is via higher rated intermediate stopover point, the fare for such fare component shall be the higher of:
 - (i) The applicable fare between the fare construction points, or
 - (ii) The fare from fare component origin to the highest rated intermediate stopover point plus the difference between such fare and the direct route fare between the fare construction points.

example: A - B - C - D

Fares	A TO B	NUC	50
	A to C		150
	A to D		140
	B to C		175
	B to D		160

Fare to be charge is
B to C NUC 175

or

A TO C	NUC	150
PLUS THE DIFFERENCE BETWEEN		
A TO C AND A TO D		
10	TOTAL NUC	160

whichever is higher

The one way backhaul rule check need not be applied for points which have been excluded from the provisions of this resolution, subject to the same conditions contained in the exclusion.
- (7) Directional minimum check (DMC) (only applicable to/from and via japan)
- (a) The fare for one way and normal open jaw PU'S shall not be less than
 - (i) One way PU: the direct route one way fare for the highest rated pair of points applicable in either direction for the class of service used between any ticketed points within each fare component.
 - (ii) Normal open jaw PU: the direct route half round trip fare for the highest rated pair of points applicable in either direction for the class of service used between any ticketed points within each fare component.
 - (b) In applying this check the comparison of fares shall follow the sequence in resolution 017c paragraph 5)a)v).
 - (c) Special one way fares

- when applying the rule in paragraph 7)a) the fares to be used shall be one way direct route fares of the same type in the absence of a fare of the same type, the next higher one way fare shall be used.
- (d) Applicable fares
- (i) The fares to be used shall be those applicable on the date of commencement of the outbound transportation; or in the case of seasonal fares, those applicable on the date which determines the seasonal level to be used. This shall apply in each component.
 - (ii) Where more than one normal fare is published for the carrier and the class of service used, the lower/lowest level may be used.
 - (iii) As used herein 'fare of the same type' shall be as defined in subparagraph 5)b).
- (e) Application of a), b) and c)
- the provisions in paragraphs a), b) and c) shall apply as shown in the attachment but shall not apply:
- (i) For traffic documents issued in tc1 for journeys commencing in tc1
 - (ii) for traffic documents issued in Canada, USA/US territories for journeys to Canada, USA/US territories.
 - (III) When the journey originates in Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Congo (Brazzaville), Cote D'Ivoire, Equatorial Guinea, Gabon, Guinea-Bissau, Mali, Niger, Senegal or Togo and the traffic document is issued in these countries.

(K) Minimum check for consecutive normal fare pricing units

(1) Return subjourneys check (RSC) (not applicable for journeys originating and/or terminating in Canada)

(a) If the total fare for the journey contains any consecutive normal fare pricing units for return subjourneys, a minimum check will be applied whereby the total fare assessed for such consecutive pricing units (excluding any side trips charged separately) shall not be less than the direct route normal round trip fare applicable to the class of service used from the unit origin of the first of such consecutive pricing units to the highest rated stopover point in any subsequent consecutive pricing units.

Example: Travel

MAD-ROM-ATH-TYO-SYD-ATH-ROM-MAD

CONSTRUCTION COULD BE

MAD-ROM RT 1 Pricing unit

ROM-ATH RT 1 Pricing unit

ATH-TYO 1/2 RT)

TYO-SYD 1/2 RT)1 Pricing unit

ATH-SYD 1/2 RT)

3 Consecutive Pricing units (RT plus RT plus CT)

All are stopover points

from unit origin of the consecutive pricing unit to any stopover point in any subsequent consecutive pricing unit,

MAD-SYD being the highest direct route round trip fare from Madrid minimum check - the total fare of these consecutive pricing units must not be less than MAD-SYD RT fare (which is the highest RT fare)

Exceptions:

- (i) (aa) If the first pricing unit is for an origin open jaw trip the direct route round trip fare shall be assessed as the sum of half the direct route round trip fare from the unit origin of such open jaw pricing unit and half the direct route round trip fare from the unit destination of such open jaw pricing unit to each stopover point in any subsequent consecutive pricing units.

Example Travel

NCE-BRU-NBO-JNB-NBO-BRU-LYS

CONSTRUCTION COULD BE

NCE-BRU 1/2 RT)

LYS-BRU 1/2 RT) 1 Pricing unit

BRU-NBO RT 1 Pricing unit

NBO-JNB RT 1 Pricing unit

* Minimum check - total fare for the pricing units must not be less than the sum of 1/2 RTS NCE-BRU plus LYS-BRU or NCE-NBO plus LYS-NBO or NCE-JNB plus LYS-JNB, whichever is the highest

- (bb) If any subsequent pricing unit is for an origin open jaw then such pricing unit will be considered as a round trip pricing unit and paragraph 1)a) will apply (i.e. close the unflown sector)

- (ii) If the last pricing unit is for a turnaround open jaw trip the direct route round trip fare to stopover/terminal points in the points in the open jaw pricing unit shall be assessed as the sum of half the direct route round trip fares from the unit origin of the first consecutive pricing unit to the highest rated stopover/terminal point in the open jaw pricing unit on the outbound component and half the direct route round trip fare from the unit origin of the first consecutive pricing unit to the highest rated stopover/terminal point in the open jaw pricing unit on the inbound component

Example: Travel BRU-NBO-LUN-DUR XXX

CPT-JNB-LUN-NBO-BRU

Construction could be

BRU-NBO RT 1 Pricing unit

NBO-LUN RT 1 Pricing unit

LUN-DUR 1/2 RT)

- LUN-CPT 1/2 RT) 1 Pricing unit
- . Minimum check - total fare for the pricing units must not be less than the BRU-LUN RT or the sum of 1/2 RTS BRU-DUR plus BRU-CPT, whichever is the highest
- (iii) If both the first and any subsequent consecutive pricing units are for origin/turnaround open jaw trips respectively then both i) and ii) above shall apply
- (b) where more than one normal fare is published for the carrier and the class of service used the lower/lowest level may be used subject to seasonality (including blackout dates) or day of week application
- (c) (i) when there are round trip fares with different global indicators from the point of origin to any stopover point, the fare to be used for the check must be that applicable to the flown itinerary
- (ii) when the flown itinerary incorporates such different global indicators (including round the world journeys), the fare must not be less than the lower of such round trip fares from the point of origin
- (d) when there are round trip fares from the point of origin to any stopover point which differ according to carrier(s) used on the outbound and inbound journeys, the fare to be used for the check shall be the lower of such round trip fares
- (e) If there is surface break between two return subjourneys, the minimum check is not applied
- (f) Multiple pricing unit assessed from a common pricing unit origin are not considered consecutive in relation to each other and the minimum check is not applied to such pricing units
- Example: Travel
TYO-SFO-LON-SFO-TYO-HKG-BOM-HKG-TYO
Construction could be
- | | | |
|---------|----|----------------|
| TYO-SFO | RT | 1 Pricing unit |
| SFO-LON | RT | 1 Pricing unit |
| TYO-HKG | RT | 1 Pricing unit |
| HKG-BOM | RT | 1 Pricing unit |
- . Minimum check is applied twice: TYO-SFO plus SFO-LON and TYO-HKG plus HKG-BOM
- . There is no minimum check other than those shown above
- (2) One way subjourneys checks (OSC) (Not applicable to journeys to/from/via USA/US territories)
- A) A specified through fare must not be undercut by a combination of fares
- b) The normal fare check (OSC) will apply between consecutive pricing units for one way

subjourneys			
Example			
A	B	C	D
100	100	100	
	300		
		250	
		500	
P	A		
P	B	100	
	C	100	
	D	100	
	H	A-C	100
	H	A-D	100
	Total	500	

- (c) where more than one normal fare is published for the carrier and the class of service used the lower/lowest level may be used subject to any stopover and transfer limitations seasonality (including blackout dates) and day of week application of the lower/lowest fare (excluding application of stopover charges)
- (d) If the OSC is applied and two or more pricing units are merged, the new single pricing unit is used for any further fare checks
- (e) If in a series of pricing units for one way subjourneys there is a surface break between fare construction points the OSC will be applied to the pricing units for one way subjourneys up to the start of the surface break and then applied separately from the point at which air transportation recommences (even if this point is a previous fare construction point)

Example: Travel MAD-NBO-DAR XXX
NBO-LUN-JNB

- . ONE WAY FARE COMPONENTS MAD-NBO,
NBO-DAR, NBO-LUN, LUN-JNB
- . NORMAL FARE CHECK MAD-DAR AND NBO-JNB

- (3) Mixture of return subjourneys and one way subjourneys
- (a) when a journey comprises pricing units which are a mixture of pricing units for return subjourneys and pricing units for one way subjourneys no overall checks will be applied. however, if there are two or more consecutive pricing units using the same fare types (half round trip or one way) then the applicable checks will be applied for such pricing units, i.e. if there are two or more consecutive pricing units for one way subjourneys the OSC will be applied between such pricing units; if there are two or more consecutive/contiguous pricing units for return subjourneys the RSC will be applied from the unit origin of the first of such pricing units to all stopover points within the consecutive/contiguous pricing (units)

Example: Travel LON-PAR-AMS-HKG-TYO-HKG-AMS
Construction could be

LON-PAR OW 1 Pricing unit
PAR-AMS OW 1 Pricing unit
AMS-HKG RT 1 Pricing unit
HKG-TYO RT 1 Pricing unit

- . OSC applies on the consecutive OWS
LON-PAR and PAR-AMS;
- . RSC applies on the consecutive RTS
AMS-HKG and HKG-TYO

Example: Travel LON-PAR-HKG-TYO-HKG XXX
PAR-LON

Construction could be

LON-PAR RT 1 Pricing unit
PAR-HKG OW 1 Pricing unit
HKG-TYO RT 1 Pricing Unit

- . No checks across the pricing units since
there are no consecutive rt pricing
units or consecutive ow subjourneys
additionally

- (i) If two or more pricing units for return
subjourneys have a common fare
construction point but are separated by
a pricing unit for a one way subjourney,
the minimum check shall be applied from
the unit origin of the first of such
units to all stopover points in the
other contiguous/consecutive pricing
unit(s)

Example: Travel JNB-ATH-IST XXX
ATH-STO-ATH-JNB

Construction could be

JNB-ATH RT 1 Pricing unit
ATH-IST OW 1 Pricing unit
ATH-STO RT 1 Pricing unit

- . As ATH is common point on 2 contiguous
RT pricing units, minimum check is
applied on the contiguous RT pricing
units JNB-ATH and ATH-STO
- (ii) If two or more pricing units for one way
subjourneys have a common fare
construction point but are separated by
a pricing unit for a return subjourney,
the normal fare check shall be applied
to all fare construction points in the
contiguous/consecutive pricing unit(s)

Example: Travel
NRK-XCPH-GLA-CPH-FRA-XMAD-PMI
Construction could be

NRK-CPH OW 1 Pricing unit
CPH-GLA RT 1 Pricing unit
CPH-PMI OW 1 Pricing unit

- . As CPH is common point on 2 contiguous
ow pricing units, normal fare check is
applied NRK-CPH plus CPH-PMI
- (b) where a journey involves travel to/from/via
USA/US territories the one way subjourney
check will not be applied

- (4) Unpublished fares

- (a) where there is no direct route fare between

two ticketed points, a fare must be constructed over an intermediate ticketed point in order to apply the provisions of paragraphs 1) and 3)

Example 1 A to B to C to D to E to C to A
(2 pricing units A-C-A and C-E-C)

Fares: No round trip fare A to D

RSC: The round trip fare a to d will be established by the lowest combination of two round trip fares using intermediate points between A and D. I.E.

A-B plus B-D or

A-C plus C-D

whichever is lower

Example 2 A TO B TO C TO D TO E TO F TO C
TO G TO A (2 pricing units
A-C-A and C-E-C)

Fares: No round trip fare A to D, nor A to F

RSC: The round trip fare a to d will be established by the lowest combination of two round trip fares using intermediate points between A and D. I.E.

A-B plus B-D OR

A-C plus C-D

whichever is lower

The round trip fare a to f will be established by the lowest combination of two round trip fares using intermediate points between A and F. I.E.

A-G plus G-F or

A-C plus C-F

whichever is lower

(B) The constructed fare shall be considered a 'direct route fare' and must be shown on the ticket as 'C/'

(5) This resolution is not applicable for journeys originating and/or terminating in Canada.

(L) Mixed class

(1) General

(a) Mixed class travel is when an itinerary involves travel in two or more classes of service:

(b) In assessing the fare for the mixed class transportation, special fares must not be used

(c) The application of this resolution shall not be used to circumvent any stopover/transfer restrictions applicable to the through fare for the lowest class of service used.

(d) Differentials are assessed in the same direction as the fare used for the lowest class of service

(e) when half round trip fares are used, differentials are assessed using half round trip fares. When one way fares are used,

- differentials are assessed using one way Fares.
- (f) class differential calculation is only subject to the hip check, no further minimum checks apply.
- (2) Fare calculation
- (a) Establish the fare for the itinerary in the lowest class of service used applying all applicable fare construction checks
- (b) Establish whether as a result of (a) above THE mixed class sector(s)
- (i) Apply within a fare component, or
- (ii) Constitute an entire fare component, or
- (iii) Constitute an entire pricing unit
- (3) Mixed class sector(s) within a fare component
- (a) If the calculation in the lower class of travel establishes that the mixed class sector(s) fall within a fare component, the differential for the sector(s) travelled in a higher class shall be the lowest of the following
- (i) The difference between the lower class fare for the sectors flown in the higher class and the fare for the higher class of travel on those sectors
- (ii) The difference between the applicable fare for the fare component in the lower class of service and the applicable fare for the component in the higher class of service.
- Example LON-BKK-HKG-LON CLASS OF Service Y except BKK-HKG F
- | | | |
|------------------------|---------|---------|
| Fares (half RT IN NUC) | First | Economy |
| LON-BKK | 4626.10 | 1929.54 |
| LON-HKG | 4895.92 | 2188.27 |
| BKK-HKG | 291.13 | 207.96 |
- The fare shall be assessed in Economy class: LON-HKG-LON-RT equals NUC 4376.54
- The differential shall be the lowest of
- | | | |
|-----------|---------|--------------|
| BKK-HKG F | 291.13 | |
| less | | |
| BKK-HKG Y | 207.96 | Differential |
| | 83.17 | |
| LON-HKG F | 4895.92 | |
| less | | |
| LON-HKG Y | 2188.27 | Differential |
| | 2707.65 | |
- The total fare shall be LON-HKG-LON RT Y 4376.54
- Plus differential 83.17
- Total 4459.71
- (B) For consecutive sectors within a fare component travelled in a higher class of service, the difference shall be the lower of
- (i) The difference between the lowest

- applicable fare for the lowest class of service used and the lowest applicable fare for the higher class used, or
- (ii) Lowest applicable through fare for the lowest class used for the sectors concerned and the lowest applicable through fare for the higher class used for such sectors
