

1. Open SIM tray

Open the SIM card tray with the pin provided.

2. Insert SIM

SIM tray slides out.

SIM tray slides in.

Place the nano SIM card in the SIM tray.

Check the SIM's corner for correct placement.

3. Plug into your Vodafone Ultra Hub

1 Connect the USB-C cable provided into the ports shown in the diagram.

2 Ensure your Vodafone Ultra Hub is set up, powered and ready.

4. Connect and ready

Within a few minutes the LED on the Vodafone Connect Module will turn white (see LED light status page) meaning the SIM has connected to the mobile network.

You're good to go!
The device will now be ready to automatically provide broadband back-up if your home broadband experiences any disruption.

Tip: Place the Vodafone Connect Module in an open area, ideally close to a window.

Tip: Avoid covering the top.

LED light statuses

- **Solid:** Connected to 4G network
- ◉ **Slow flash:** Connected to 3G/2G network
- ◉ **Flash:** Error, no SIM, no mobile network
- **Solid:** Data limit reached
- ⚙️ **Flash:** Ongoing software update
- ⚙️ **Flash:** Power on and factory resetting
