

Please read this safety information before you use the device. Following the warnings will help prevent injury to yourself or others and damage to your device.

Pictograms and Graphic Symbols

Read the Safety Information before using this device. Failure to comply with safety warnings can result in serious injury.

Do not use while driving

For body-worn operation maintain a separation of 5mm

Keep away from pacemakers and other personal medical devices

Switch off when instructed in hospitals and medical facilities

Switch off when instructed in aircrafts and airports

Switch off in explosive environments

Do not use while refueling or near gas or flammable liquids

Do not dispose of this device or its battery in a fire.

Avoid contact with magnetic media

Avoid Extreme Temperatures

Avoid contact with liquid, keep dry

Do not try and disassemble

Do not rely on this device for emergency communications

Only use approved accessories

This device is not intended for use by young children. If you allow a child to use it ensure the child is strictly supervised. This device contains small parts which are a choking hazard

Do not to use this device whilst walking across a road or cycling

RF Exposure

Your device contains a radio transmitter and a receiver. When it is ON, it receives and transmits RF energy. When your device is in

use, the system handling your connection controls the power level at which your device transmits.

Specific Absorption Rate (SAR)

Your wireless device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. The SAR limit for wireless devices is 2 W/kg and the highest SAR value for this device when tested at the body was 0.795 W/kg* with 5 mm distance.

SAR is measured utilizing the device's highest transmitting power and where supported with multiple simultaneous transmitters. The actual SAR of this device while operating is typically well below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

* The tests are carried out in accordance with EN 50566:2017 and EN 62209-2:2010+A1:2019.

Body worn operation

To ensure compliance with RF exposure guidelines the device must be used with a minimum of 0.5 cm separation from the body.

Failure to observe these instructions could result in your RF exposure exceeding the relevant guideline limits and may use more power than necessary.

Distraction

Driving

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using this device while driving causes distraction and can lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

Operating machinery

Full attention must be given to operating the machinery in order to reduce the risk of an accident.

Device Handling

You alone are responsible for how you use your device and any consequences of its use.

You must always switch off your device wherever the use of a mobile phone is prohibited. Use of your device is subject to safety measures designed to protect users and their environment.

- Always treat your device and its accessories with care and keep it in a clean and dust-free place.
- Do not expose your device or its accessories to open flames or lit tobacco devices.
- Do not expose your device or its accessories to liquid, moisture or high humidity.
- Do not drop, throw or try to bend your device or its accessories.
- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its accessories.
- Do not paint your device or its accessories.
- Do not attempt to disassemble your device or its accessories: only authorized personnel must do so.
- Do not expose your device or its accessories to extreme temperatures, minimum -5 and maximum +55 degrees Celsius. For optimal performance operate within a range of minimum 0 and maximum +35 degrees Celsius.
- Please check local regulations for disposal of electronic devices.
- Do not carry your device in your back pocket as it could break when you sit down.

Small Children

Do not leave your device and its accessories within the reach of small children or allow them to play with it. They could hurt themselves or others, or could accidentally damage the device.

Your device contains small parts with sharp edges that may cause an injury or which could become detached and create a choking hazard.

Electrostatic discharge (ESD)

Do not touch the SIM card's metal connectors

Power supply

Do not connect your device to the power supply or switch it on until instructed to do so in the installation instructions.

Air Bags

Do not place this device in the area over an air bag or in the air bag deployment area. Store the device safely before driving your vehicle.

Emergency Situations

This device, like any wireless device, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless device for emergency communications.

Emergency Calls

Your landline phone services (if selected) will be provided over the internet instead of a traditional phone line. This means that if there is a power outage or you don't have any broadband connectivity you won't be

able to make or receive calls. This includes emergency calls.

Do not solely rely on the service to make emergency calls. You acknowledge and accept that you will require another way to call the emergency services. We suggest you have a charged mobile device in order to make emergency calls in the event of a power or broadband connectivity outage.

Device Heating

Your device may become warm during charging and during normal use, do not use this device if it is overheated.

Electrical Safety

Accessories

Use only Vodafone approved accessories and power adapters and do not connect with devices or accessories that have not been deemed compatible by Vodafone. Do not touch your device with wet hands. Doing so may cause an electric shock.

Connection to a Car

Seek professional advice when connecting a device interface to the vehicle electrical system.

Faulty and Damaged Devices

Do not attempt to disassemble the device or its accessory. Only qualified personnel should service or

repair the device or its accessory. If your device or its accessory has been submerged in water or other liquid, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorized service centre.

Interference

Care must be taken when using the device in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a device and a pacemaker to avoid potential interference with the pacemaker.

Hearing Aids

People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby. The level of interference will depend on the type of hearing device and the distance from the interference source, increasing the separation between them may reduce the interference. You may also consult your hearing aid manufacturer to discuss alternatives.

Medical devices

Please consult your doctor and the medical device manufacturer to determine if operation of your device may interfere with the operation of your medical device.

Hospitals

Switch off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Aircraft

Switch off your wireless device whenever you are instructed to do so by airport or airline staff. Consult the airline staff about the use of wireless devices on board the aircraft. If your device offers a 'flight mode' this must be enabled prior to boarding an aircraft.

Interference in cars

Please note that because of possible interference to electronic equipment, some vehicle manufacturers forbid the use of devices in their vehicles unless an external antenna is included in the installation.

Explosive environments Petrol stations and explosive atmospheres

In potentially explosive environments,

obey all instructions to turn off wireless devices such as the device or other radio equipment.

Do not use the device in areas with potentially explosive atmospheres like below decks on boats. Also do not use the device in fuelling areas, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas

Turn off your device or wireless device when in a blasting area or in areas posted turn off "two-way radios" or "electronic devices" to avoid interfering with blasting operations.

Software Information

Use only with the authorised Release app. Software updates may be released to fix bugs and / or improve the device's capabilities.

Software Updates

By continuing to use this device, you indicate that you have read and agree to the following content: In order to provide better service, this device will automatically check for/obtain software update information from Vodafone and its partners after connecting to the Internet. This process may use mobile data,

and requires access to your device's unique identifier (IMEI/SN) and the service provider network ID (PLMN) to check whether your device needs to be updated.

Note that neither Vodafone nor its partners will use the IMEI/SN information for the purposes of personally identifying you, this is only used for scheduling/managing software updates.

Specification

This radio equipment operates with the following frequency bands and maximum radio-frequency power.

NOTE:

This device is compliant with the power limits required by the European Union. Frequency bands supported by the device vary by model.

Services	Power Level (Maximum)
GSM 900 MHz	35 dBm
GSM 1800/1900 MHz	32 dBm
UMTS Band 1 (2100 MHz)	25.7 dBm
UMTS Band 8 (900 MHz)	25.7 dBm
LTE FDD Band 1 (2100 MHz)	25.7 dBm
LTE FDD Band 3 (1800 MHz)	25.7 dBm
LTE FDD Band 8 (900 MHz)	25.7 dBm
LTE FDD Band 20 (DD800MHz)	25.7 dBm

Disposal of Your Old Appliance

1. When this crossed-out wheeled bin symbol is attached to a device, it means the device is covered by the European Directive 2012/19/EU.
2. All electrical and electronic devices should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.
3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.

Disposal and recycling information

- Electric and electronic equipment must not be disposed of as household waste. Doing so may result in prosecution and a fine.
- Hazardous substances contained in electrical and electronic equipment and their improper use may have adverse effects on the environment and human health. When electrical and electronic equipment reaches the end of its life, it must be collected and recycled separately.
- The crossed out wheeled bin symbol as shown in the figure means the device should be collected and disposed of separately from household waste
- When the device reaches the end of its life, dispose of it at an appropriate waste disposal facility or when purchasing new like for like equipment, take it to the retailer.
- Contact Vodafone customer services for further information on how to safely dispose of the device.

Reduction of hazardous substances

The device and its electrical accessories comply with the local regulations on the restrictions and use of hazardous substances in electrical and electronic equipment. For RoHS compliance statements, please refer to the applicable DoC.

UKCA DECLARATION OF CONFORMITY

Hereby, Vodafone declares that the radio equipment type Vodafone Mobile K5161z is in compliance with Radio Equipment Regulations 2017. The full text of the UKCA declaration of conformity is available at the following Internet address: vodafone.com/K5161z/ec-declaration

This product is compliant with the applicable security requirements of The Product Security and Telecommunications Infrastructure Act 2022. For the full Statement of compliance, or to report a product vulnerability, please head to: vodafone.co.uk/product-safety
